# About Nav Bharat Organics

- Nav Bharat Organics provides customers throughout India with durable coatings designed to protect, increase productivity and add color. Celebrating over 30 years of experience in the coatings industry, we continue to find new ways to better serve our customers every day with advanced coatings technology.
- We are an ISO 9001:2008 certified organization with rich experience in the production of industrial and automotive coatings. Headquartered in Faridabad, we have two manufacturing units located in Sector 59 and Ballabgarh, Faridabad.

# Facility

- Production capacity of over 100,000 L of liquid paint and 100 tonnes of powder coat per month
- High production and delivery lead times
- Competitive after-sales technical service

- Fully functional R&D lab equipped with instruments for paint development and quality testing as per ISO standards
- Supported by a team of highly qualified chemists

# Our Customers and Products

## Auto Components

Coatings on auto components are designed to protect vehicles from the destructive effects of constant exposure to weather, sunlight, and harsh road conditions.

## Commercial Vehicles

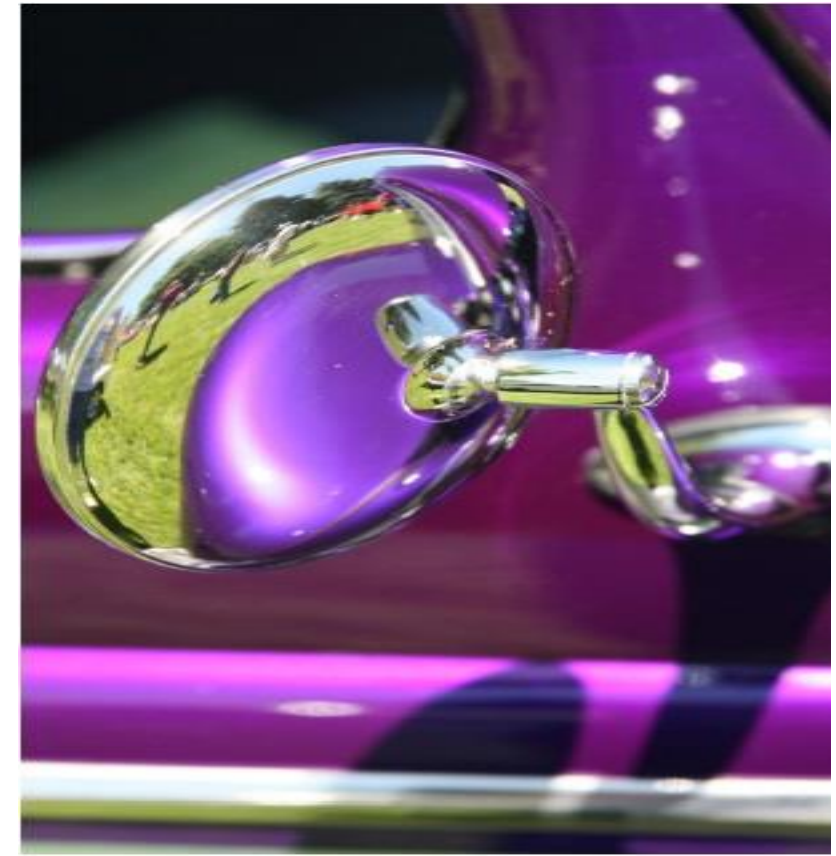

Our sophisticated coatings are formulated to protect a catalogue of diverse products from harsh environments and operating conditions. Our coatings protect vehicle components from corrosion underground withstand extreme climates.

## Industrial Parts

Coatings for industrial applications are created to withstand the effects of different environments – like heat resistant coatings formulated to endure the harshest climates that can tolerate increasingly high temperatures and corrosive environments.

# Benefits of Coatings

- **Durability**
- **Protection**
- **Productivity**
- **Brilliant Colour**

# Technology

## Topcoats and Enamels

- Epoxy Finish Paints
- Coal Tar Epoxy Coating
- High Build Epoxy Topcoat
- Aromatic Polyurethane Topcoat
- Acrylic Q.D. Anti – Corrosive Zinc Chromate Enamel
- High Chemical Resistant Polyurethane Topcoat

## Primers

- Polyurethane/Epoxy Penetrating Primers
- Polyurethane/Epoxy High Build Primers
- High Build Epoxy Zinc Phosphate Primers
- High Build Epoxy Red Oxide Zinc Phosphate Primers
- Acrylic Q.D. Anti – Corrosive Zinc Chromate Primer
- Chlorinated Rubber Primer Coat

## Powder Coating

- Epoxy-based Metallic Finish
- Epoxy-based Texture Finish
- Epoxy-based Glossy/Semi-Glossy Finish
- Epoxy-based Satin and Semi-Matt
- Epoxy-based Pure Polyester
- Epoxy-based Wrinkle Finish
